

Aniruddha Das

Kolkata-700135, WB | (+91) 9123987124 | ani.coderxdev@gmail.com | LinkedIn: <https://bit.ly/linkdin-ani>

PROFESSIONAL SUMMARY (https://linktr.ee/aniruddha_das)

Detail-oriented and results-focused **IT Analyst** with over **5 years** of experience in **data analysis** and **11+ years** of diverse exposure in the IT and BPO sectors at TCS. Skilled in managing large datasets and performing data wrangling to extract actionable insights, with hands-on experience in **building KPIs** from raw data and driving approximately **34%** issue reduction for application teams, along with enabling **12–15%** improvement in sales and inventory efficiency through data-driven insights. Experienced in delivering strategic reports to stakeholders. **Seeking an opportunity** to apply **analytics expertise** to drive business growth and operational efficiency.

CORE COMPETENCIES

- Data Analysis (Python, Excel), Visualization
- Business Intelligence (BI) Tools (Power BI, Tableau)
- SQL & Database Management
- DAX, Power Query, Power BI Report Server
- Data Wrangling & Cleansing
- Data Modelling
- Reporting & Dashboard Creation
- Stakeholder Management
- Azure Foundation
- Project Management
- Team Leadership
- Power Platforms

EDUCATION

- **B.COM (H):** WB State University, 2012 Pass-out
- **MBA (FINANCE):** SMU (Distance), 2015 Pass-out

SKILLS SUMMARY

- **Languages:** Python, SQL, VBA, R, JavaScript
- **Frameworks:** Pandas, NumPy, Matplotlib, Seaborn
- **Database Management:** MySQL, Postgres
- **BI Tools for Visualization:** Power BI, Tableau, Excel
- **Tools for Presentation:** PowerPoint, Canva
- **Power Platforms:** Automate, Apps & Pages

CERTIFICATIONS (<https://bit.ly/certificates-ani>)

- **Microsoft Certified: PL-300** Power BI Data Analyst
- Google Data Analytics Professional Certificate
- Google Business Intelligence Certificate
- Google Project Management Professional Cert.
- Six Sigma Green Belt Certified (TCS)
- Hackerrank Basic: Python, SQL

WORK EXPERIENCE

Tata Consultancy Services (TCS) – Analyst

Period: Jan 2021 – Oct 2025

- Led end-to-end **ETL** automation by extracting and processing large volumes of operational, sales, and retail data using Power Query. Converted unstructured logs and raw transactional data into clean tabular formats ready for modeling in Power BI.
- On a daily basis, refreshed datasets and updated Power BI **dashboards** covering infrastructure alerts, sales performance, and retail KPIs, providing real-time insights to business stakeholders.
- Designed **scalable Power BI semantic data models** and wrote complex **DAX** measures for KPIs such as MTTR, revenue growth %, profit margin, inventory turnover, alert count by severity, repeat issues, and false alert trends.
- Created role-based dashboards for technical and business stakeholders (App teams, Infrastructure leads, Sales and Retail managers), enabling **drill-through analysis** by server ID, product, region, category, and time period.
- Detected patterns in repeated alerts and low-performing products; facilitated data-backed decisions that led to **~34%** reduction in infra issues and supported business actions resulting in approximately **12–15%** improvement in sales and inventory efficiency.
- Worked directly with stakeholders to gather reporting needs and adjusted dashboards accordingly — including weekly distribution of Power BI reports in PDF and Excel aligned with operational, sales, and retail KPIs.
- Acted as the Power BI analyst for the team; supported internal users with training on interpreting dashboards, sharing reports, and modifying visualizations based on operational and business requirements.

Tata Consultancy Services (TCS) – Associate | SME | QA | Tester | SDL | PMO

Period: July 2014 – Dec 2020

- Previously held diverse roles including Associate, SME, QA, Tester, Security Deployment Lead (SDL), Project Management Officer (PMO) at TCS. These positions helped me build a strong foundation in operations, process improvement, stakeholder coordination, and data-driven decision-making.

PROFESSIONAL DEVELOPMENT

- AZ-900 Professional Certification
- Exploring SSRS, SSIS, SSAS

AWARDS

- Special Initiative Award (x2)
- Star Performer Award (x2)

PROJECTS

Office Projects:

- **Sales Performance Dashboard**
 - Built an interactive Sales Dashboard featuring key KPIs such as Total Revenue, Sales Growth %, Profit Margin, Average Order Value (AOV), and Region-wise and Product-wise sales performance.
 - Designed supporting data models and transformations using Power Query and DAX, enabling structured sales data analysis and automated reporting for business stakeholders.
- **Retail Operations & Inventory Dashboard**
 - Built a Retail Dashboard highlighting operational KPIs such as Store Revenue, Inventory Turnover, Stock-Out Rate, Category-wise Sales, and Sales vs Target performance.
 - Designed supporting datasets and KPI calculations to analyze demand patterns and inventory efficiency, enabling data-driven decisions for store operations and inventory planning.
- **Server Monitoring Mail Alerts Scraper & Segregator**
 - Developed VBA scripts to scrape server alert emails from a specified Outlook mailbox, importing the data into Excel over a defined period.
 - Created VBA scripts to segregate and transform raw email content into structured data, categorizing details such as server, IP, range, alert type, and issues etc.
 - Designed custom Excel formulas to meet specific project requirements for data transformation.
 - Automated approximately 70-80% of the ETL process in real-time, significantly reducing the time needed to convert raw data into actionable insights.
- **Server Monitoring Dashboard for Product Teams**
 - Built a Server Monitoring Dashboard for internal teams, highlighting key metrics like Mean Time to Resolve (MTTR), level-wise MTTR, volume segregation, and trend analysis.
 - Ongoing project to fine-tune for distributing weekly insights to product teams.
- **Automated Product Data Visualization Generator**
 - Automated the generation of data visualizations for product presentation decks using VBA scripts.
 - This project significantly reduced the time required for data preparation, enabling product-specific analytics and insights, thus enhancing decision-making.

Personal Portfolio Projects on GitHub: <https://github.com/AniruddhaDas1>

Power BI Portfolio Projects using DAX & Power Query

- **Credit Card Analysis Dashboard ([Link](#))**
 - Objective: Analyze credit card transaction data and customer demographics to identify key performance indicators (KPIs) and derive actionable insights for business optimization.
- **IPL Analytics Dashboard ([Link](#))**
 - Objective: Created an interactive Power BI dashboard to analyze Indian Premier League (IPL) 2019 season data, providing key performance indicators (KPIs) and insights for teams and players.
- **Pizza Hut Sales Dashboard ([Link](#))**
 - Objective: Analyze Pizza Hut sales data from Jan '15 to Dec '15 to identify key performance indicators (KPIs) and derive actionable insights for business optimization.

Tableau Portfolio Projects

- **EV Data Analysis Dashboard ([Link](#))**
 - Objective: Analyze and visualize various aspects of sales trends, geographic distribution, and other key metrics relevant to the EV industry.

Python Portfolio Projects

- **Perfume Sales Data Analysis Projects ([Link](#))**
 - Objective: Analyze and visualize sales performance, pricing strategies, and inventory management to optimize revenue and stock levels for different perfume brands in an e-commerce setting.

Excel Dashboard Portfolio Projects

- **CRM Sales Dashboard ([Link](#))**
 - Objective: Visualize CRM sales data for comprehensive analysis.
- **Bank Loan Report Dashboard ([Link](#))**
 - Objective: Analyze and visualize bank loan data with a detailed dashboard.

SQL Projects

- **Real Estate-Nashville DB Data Analysis ([Link](#))**
 - Objective: Perform in-depth analysis of Real Estate data using SQL queries.
